

SAP FICO trainer

Thanks to relevant business experience, you have a good sense of the issues and sensitivities that employees are facing during changes within a company. You have SAP knowledge and experience as SAP end user or trainer. Based on that experience and as a Global Services SAP trainer, you will guide the end users of our clients through change processes.

During your training period, we ensure that you will get familiar with both the principles behind SAP as the application in practice. After that, you will be able to assist our customers and their employees by introducing and optimizing the use of SAP. You take part in the preparation of course materials and provide training on the various SAP modules.

Profile

- ✓ You are flexible and stress resistant.
- ✓ You enjoy working independently.
- ✓ You can easily express yourself in Dutch and you are not afraid to communicate in another language (English or French). You can deal with IT tools, like Office.
- ✓ End user knowledge of the SAP FICO module is required.
- ✓ Experience as a trainer is a plus, but not required. More important: you can express yourself fluently and you like to speak in front of a group.

Offer

We offer you an exciting and varied job in a pleasant working environment. You get a SAP training depending on the project you are assigned to. Depending on your choice, you will be employed with a permanent contract or you can work with us as an independent contractor. Always with the greatest respect for the Belgian and Dutch legislation. The conditions are further discussed during the job interview.
